

Personalized exclusively for: Kristi Warner

On: January 15th, 2024

Welcome

Congratulations! You have in your hands the most advanced diet available anywhere, at any price. It is the most individualized program available for losing fat. This diet will not work effectively for anyone else because it has been created just for you, using your lean body mass (LBM), your job, your day to day, and your weekly plan for weight training (WT), high heart rate aerobic activity (HHT), and low heart rate aerobic activity (LHR).

How we did it. We determined your lean weight using sophisticated body composition testing. Then you told us about your job, day to day, and exercise hours. With this information, the computer generated this report. Page two is your Lean Body Analysis, including your projected progress; the pages that follow are your custom-designed diet and food list.

Lean Body Analysis

Page two is the results of your body composition test. Although very few people want to know how fat they are, all of them want to know how to lose fat. Our Lean Body Analysis page includes your profile, a snapshot of where you are today, and a Projected Progress bar — where you are and where you are headed. LBM (lean body mass) is used by the computer to calculate your metabolic rate (RMR). The bar shows appropriate weight goals for each leanness stage and projected body fat over time, based on your current lean body mass.

Food Plan

Page three is your custom-designed food plan. It explains why servings — not app macros — are your path, what each food group does for your body, and how the Burn Engine built your prescription from your lean body mass, job, and exercise. The servings on page four follow directly from this page.

Servings

Page four is the servings page. No need to count calories or macronutrients (protein, carbohydrates, and fat) yourself. The computer turns everything from page three into daily servings divided across breakfast, lunch, dinner, and snacks — so you have maximum strength and energy while losing fat as fast as this plan allows.

Food List

Pages five through seven are your food list. Page five lists protein, grains, and starches. Page six lists vegetables and fruit. Page seven covers seasonings and splashes. These foods were chosen from the bodybuilder cutting-diet staples used in Warner 1982 — foods that work in real prep, not theory. Each item is matched to Burn Engine serving rules and sized with USDA nutrition data so one serving delivers the protein, carbohydrate, or produce your plan calls for. The gram weights on your list are scaled to your daily servings from page four. Weigh your portions, stay inside your servings, and build meals only from these approved foods.

Lean Body Analysis

HEIGHT	SEX	BODY COMP	AGE
66 in.	FEMALE	Skinfolds	28 years of experience
TODAY			
	%		lbs.
LEAN	61.78%		113.7 lbs.
FAT	38.22%		70.3 lbs.
TOTAL	100.00%		184.0 lbs.

PROJECTED PROGRESS

WHERE YOU ARE. WHERE YOU'RE HEADED.

CONGRATULATIONS! Your LBM is at or above the desirable amount.

A female your height in good condition has 106 pounds or more of lean body weight. Lean body mass is everything in your body that is not fat — muscle, bone, organs, and fluids. It drives metabolism. Burn & Build is built to reduce fat while protecting that lean tissue. How much fat is right for you is a personal choice. How you look in the mirror is the only true judge of whether you're where you want to be.

Food Plan

Most diets hand you numbers from somewhere else — calories from a formula, protein from a blog, macros from an app. Those tools are built on averages. They do not know your lean body mass, your job, or how many hours you spend on weight training (WT), high heart rate aerobic activity (HHT), or low heart rate aerobic activity (LHR). Comparing your plan to them will never line up — because they were never answering your question.

Warner 1982 asked the question that actually matters: how much food do you need for what you do? Burn & Build 2026 still starts there. The Burn Engine calculated your answer from your body composition test and your questionnaire — then converted it into servings so you can eat without running someone else's math.

Let the apps go. Your servings on the next page are not a dumbed-down version of a macro chart. They are your prescription — built once, for you alone. Follow them, pick from your food list, and judge progress in the mirror and on the scale over weeks — not against a number on a screen that knows nothing about you.

Your daily servings

The computer already did the work. Your daily totals are servings of protein, grains, vegetables, fruits, and fats — spread across breakfast, lunch, dinner, and snacks.

You do not convert these to grams, calories, or macro percentages. That is the old habit. Your job is to hit your serving totals from the approved food list — nothing more.

Protein, carbohydrates, and fat are not trends — each one has a job in your body. The table below is not a macro chart. It shows what happens when any food group is too high or too low while you follow your servings.

FOOD GROUPS	TOO MUCH	TOO LITTLE
PROTEIN	GAIN FAT	LOSE LBM (MUSCLE)
CARBOHYDRATES	GAIN FAT	LOSE ENERGY
FAT	GAIN FAT	LOSE FAT

Servings

NOTE: Always consult your physician before starting this plan or making any change in your eating habits.

	Daily	Breakfast	Snack	Lunch	Snack	Dinner	Snack
Protein	9	3		3		3	
Grains/Starches	9	3		3		3	
Veggies	1						
Fruits	3		1		1		1

Food List

Protein Staples

1% milk	705g
Chicken breast	78g
Cod	105g
Cottage cheese, 1%	219g
Cottage cheese, 2%	219g
Cottage cheese, nonfat	234g
Egg whites (extra large)	6 whites
Egg whites (small)	9 whites
Eye of round	81g
Greek yogurt, lowfat	240g
Lactose-free skim milk	705g
Lean ground beef (ground round)	81g
Plain Greek yogurt, nonfat	234g
Ricotta, nonfat	210g
Shrimp	99g
Sirloin steak	81g
Skim milk	705g
Tilapia	93g
Tuna (canned)	102g
Turkey breast	84g
Yogurt, plain, nonfat	420g

Grains & Starches

Bagel	84g
Beans (any on list)	177g
Cheerios	57g
Corn grits	54g
Corn, sweet	195g
Cream of Wheat (dry)	54g
English muffin	96g
Farina (dry)	54g
French bread	81g
Hard roll	81g
Mixed peas and carrots	420g
Multigrain bread	96g
Oatmeal (dry)	63g
Pasta (cooked)	168g
Pasta, whole wheat (cooked)	159g
Peas, green	270g
Peas, split	204g
Pita (pocket)	75g
Popcorn (air popped)	54g
Potato, baked (with skin)	198g
Potato, boiled	210g
Quinoa (cooked)	198g
Rice, brown (cooked)	180g
Rice, white (cooked)	150g
Rye bread	87g
Sweet potato	204g
Tortilla, corn (6-inch)	93g
Tortilla, whole wheat	93g
Whole wheat bread	102g
Whole wheat roll	81g

Food List

Vegetables

Asparagus (cooked)	256g
Asparagus (raw)	256g
Bell peppers, orange (cooked)	149g
Bell peppers, orange (raw)	167g
Bell peppers, red (cooked)	149g
Bell peppers, red (raw)	167g
Bell peppers, yellow (cooked)	149g
Bell peppers, yellow (raw)	167g
Broccoli (cooked)	139g
Broccoli (raw)	152g
Carrots (cooked)	122g
Carrots (raw)	104g
Cauliflower (cooked)	244g
Cauliflower (raw)	200g
Cucumbers (raw)	278g
Green beans (cooked)	143g
Green beans (raw)	143g
Mushrooms, white (cooked)	189g
Mushrooms, white (raw)	303g
Spinach (cooked)	263g
Spinach (raw)	278g
Squash, summer (yellow) (raw)	294g
Squash, winter (hubbard) (raw)	115g
Squash, zucchini (raw)	323g
Tomatoes (cooked)	250g
Tomatoes (raw)	256g

Fruit

Apples (raw)	130g
Bananas (raw)	79g
Blueberries (raw)	124g
Cantaloupe (raw)	220g
Clementines (raw)	150g
Dried plums (pitted prunes)	28g
Grapes (raw)	99g
Pineapple (raw)	137g
Strawberries (raw)	234g
Tangerines (raw)	135g
Watermelon (raw)	237g

Seasonings And Splashes

Flavor Kits Fire • Chili powder • Cumin • Garlic powder • Salt • Black pepper Iron • Salt • Black pepper • Garlic powder • Onion powder Green • Lemon pepper • Garlic • Dried basil Earth • Sage • Thyme • Black pepper • Mustard powder	Splashes • Low-sodium soy sauce • Mustard • Salsa • Vinegar • Hot sauce • Lemon juice • Lime juice 	Pantry • Cooking spray • Nonstick foil • Coffee • Tea • Zero-calorie beverages
--	--	--

Flavor kits don’t count toward protein or G/S servings.

Splashes are liquids used while cooking — normal amounts, not a beverage.
