

FOOD PLAN

The following food program contains a sophisticated calculation that is based on your individual lean body mass (LBM), and on your activities. This is the most individualized food program available for losing fat and getting more energy.

In eight weeks, you could safely lose **11.0 pounds of fat**.

On your information sheet, you indicated you plan to exercise a total of **6.00 hour(s) per week**.

3.00 hour(s) of weights/racquet sports, 0.00 hour(s) of cardiovascular activities, 3.00 hour(s) of fat-burning activities

TODAY		YOU COULD LOSE	8-WEEK GOAL	
	LEAN 61.78% 113.7 lbs.	-11.0 LBS FAT		LEAN 65.71% 113.7 lbs.
	FAT 38.22% 70.3 lbs.			FAT 34.29% 59.3 lbs.
	TOTAL 100.00% 184.0 lbs.			TOTAL 100.00% 173.0 lbs.

You project to lose an average of 1.3 pounds of fat per week. In addition, you could gain lean weight. Gaining lean weight will increase your strength and energy and offset your fat loss.

How much food you need each day depends on how much LBM you have. Also, it depends on your activity level and the type and amount of exercise you participate in. Based on the information you provided, the following table gives you the number of calories and the amount of protein, carbohydrates and fat you need per day to maintain your fat or to reduce body fat. Also listed is what your body requires at rest (your resting metabolic rate), for your workday and for one hour of each type of exercise.

YOUR DAILY FOOD REQUIREMENTS							
	PROTEIN		CARBS		FATS		TOTAL
	grams	calories	grams	calories	grams	calories	calories
Maintain current fat %	71	284	219	876	115	1,032	2,192
Reduce current fat % (YOUR PLAN)	71	284	219	876	44	392	1,552
Resting(RMR)	44	177	78	310	80	723	1,211
Workday (Sitting)	25	98	90	359	27	245	702
Weights/Racquet Sports (3 hours)	9	34	96	385	3	29	448
Cardiovascular Activities (0 hours)	3	14	88	351	16	144	509
Fat Burning Activities (3 hours)	5	18	54	217	22	201	436

SERVINGS

Your daily servings and how to use them.

	Daily	Breakfast	Snack	Lunch	Snack	Dinner	Snack
Protein	9	3		3		3	
Grains/Starches	9	3		3		3	
Veggies	1	can be eaten any time of day.					
Fruits	3		1		1		1

GETTING STARTED

- Eat all the servings recommended.
- Alternate meals with fruit snacks.
- Eat every two to three hours.

Helpful Tips

Salt

Using salt is a personal choice. Most people find when they eat less fat, they also eat less salt (chips, cheese, margarine, bacon, sausage, fast food)—you get the point.

Beverages

Coffee, tea, diet drinks and seltzer water are fine. Although they do not affect fat loss, you may want to avoid them for other health reasons. Water is the best drink in the house. A simple rule is to drink a glass with every meal and snack that you eat.

NOTE: Always consult your physician before starting this plan or making any change in your eating habits.

FOOD LIST

The amount shown is calculated to match your servings. No math needed.

Protein & Dairy

Chicken breast	78g
Cod	105g
Cottage cheese, 1%	219g
Cottage cheese, 2%	219g
Cottage cheese, nonfat	234g
Eggs	3 whole eggs (yolks optional) / 3 egg whites
Eye of round	81g
Greek yogurt, lowfat	240g
Lean ground beef (ground round)	81g
Plain Greek yogurt, nonfat	234g
Ricotta, nonfat	210g
Shrimp	99g
Sirloin steak	81g
Tilapia	93g
Tuna (canned)	102g
Turkey breast	84g
Yogurt, plain, nonfat	420g

Grains & Starches

Bagel	84g
Beans (any on list)	177g
Cheerios	57g
Corn grits	54g
Corn, sweet	195g
Cream of Wheat (dry)	54g
English muffin	96g
Farina (dry)	54g
French bread	81g
Hard roll	81g
Mixed peas and carrots	420g
Multigrain bread	96g
Oatmeal (dry)	63g
Pasta (cooked)	168g
Pasta, whole wheat (cooked)	159g
Peas, green	270g
Peas, split	204g
Pita (pocket)	75g
Popcorn (air popped)	54g

How much fat is right for each individual is a personal choice. How you look in the mirror is the only true judge of whether you have fat to lose. If you see more fat than you personally want, then exercise and follow your this plan until you reach your desired goals.

A female your height in good condition has 106 pounds or more of lean body weight.

113.7 lbs lean body mass

Your LBM is at or above the desirable amount for your height.

Why Lean Body Mass Matters

Lean body mass is predominantly muscle. It's your strength, your energy, and your true body shape underneath the fat. It also includes your bones, organs, skin, hair, and more.

Actually, it's you.

Keeping your lean body mass means keeping as much of *you* as possible—strong, energetic and vibrant.

AT YOUR CURRENT 113.7 LBS OF LEAN MASS

Here are the body weights corresponding to the different body-fat ranges.

VERY LEAN	LEAN	AVERAGE	ABOVE AVERAGE	HIGH
125-130 lbs.	131-143 lbs.	143-152 lbs.	153-166 lbs.	167 lbs. or more

Continue to monitor your body composition using Lean Body Analysis every 6 to 8 weeks to make sure you are losing only fat and not lean! If you want to lose fat, do so by following this diet as closely as you can. This plan allows you to lose all the fat you want to lose while increasing your strength & energy.

QUESTIONNAIRE **CONFIRMATION**

These are the answers used to build your personalized food plan.

1. What is your full name?	Sample Female
2. What is your gender?	female
3. What is your email address?	verify@example.com
5. Who do we thank?	—
6. How physically active is your job?	Sitting
7. Your life outside work & training hours	Comfortable
8. How young are you?	28
9. How many hours per week of Weights/Racquet Sports?	3
10. How many hours per week in your cardio training range?	0
11. How many hours per week in your fat burning training range?	3
12. What is your height?	5'6"
13. What is your weight?	184 lbs
14. What is your body fat percentage?	38.22%
15. How do you know?	Calipers
16. Signed	Sample Female — 01 / 15 / 2024
