

FOOD PLAN

The following food program is calculated from your individual lean body mass (LBM) and your activities. Your food plan is calculated specifically for you.

In eight weeks, you could lose **15.9 pounds of fat**. On your information sheet, you indicated you plan to exercise a total of **9.00 hour(s) per week**.

3.00 hour(s) of weights/racquet sports, 3.00 hour(s) of cardiovascular activities, 3.00 hour(s) of fat-burning activities

TODAY	YOU COULD LOSE	8-WEEK GOAL
LEAN 75.00% 156.0 lbs. FAT 25.00% 52.0 lbs. TOTAL 100.00% 208.0 lbs.	-15.9 LBS FAT	LEAN 81.23% 156.0 lbs. FAT 18.77% 36.1 lbs. TOTAL 100.00% 192.1 lbs.

Your plan projects an average fat loss of 1.8 pounds per week. In addition, you could gain lean weight. Gaining lean weight will increase your strength and energy and offset your fat loss.

How much food you need each day depends on how much LBM you have. Also, it depends on your activity level and the type and amount of exercise you participate in. Based on the information you provided, the following table gives you the number of calories and the amount of protein, carbohydrates and fat you need per day to maintain your fat or to reduce body fat. Also listed is what your body requires at rest (your resting metabolic rate), for your workday and for one hour of each type of exercise.

YOUR DAILY FOOD REQUIREMENTS							
	PROTEIN		CARBS		FATS		TOTAL
	grams	calories	grams	calories	grams	calories	calories
Maintain current fat %	99	398	352	1,408	167	1,500	3,306
Reduce current fat % (YOUR PLAN)	99	398	352	1,408	63	570	2,376
Resting(RMR)	61	243	106	425	110	993	1,661
Workday (Sitting)	34	135	123	492	37	336	964
Weights/Racquet Sports (3 hours)	12	47	132	528	4	40	615
Cardiovascular Activities (3 hours)	5	19	121	482	22	197	698
Fat Burning Activities (3 hours)	6	25	75	298	31	275	598

MENU PLAN

SERVINGS

Your daily servings and how to use them.

	Daily	Breakfast	Fruit	Lunch	Fruit	Dinner	Fruit
Protein & Dairy	11	3.66		3.66		3.66	
Grain & Starch	16	5.33		5.33		5.33	
Veggies	1	can be eaten any time of day.					
Fruit	4		1.33		1.33		1.33

GETTING STARTED

- Eat all the servings recommended.
- Alternate meals with fruit snacks.
- Eat every two to three hours.
- Eliminate extra fats, sugar and alcohol. They slow down your fat loss.

Helpful Tips

Salt

Using salt is a personal choice. Most people find when they eat less fat, they also eat less salt (chips, cheese, margarine, bacon, sausage, fast food)—you get the point.

Beverages

Coffee, tea, diet drinks and seltzer water are fine. Although they do not affect fat loss, you may want to avoid them for other health reasons. Water is the best drink in the house. A simple rule is to drink a glass with every meal and snack that you eat.

NOTE: Always consult your physician before starting this plan or making any change in your eating habits.

FOOD LIST

The amount shown is calculated to match your servings. No math needed.

Protein & Dairy

Chicken breast	95g
Cod	128g
Cottage cheese, 1%	268g
Cottage cheese, 2%	268g
Cottage cheese, nonfat	286g
Eggs	
4 whole eggs (yolks optional) / 4 egg whites	
Eye of round	99g
Greek yogurt, lowfat	293g
Lean ground beef (ground round)	99g
Plain Greek yogurt, nonfat	286g
Ricotta, nonfat	257g
Shrimp	121g
Sirloin steak	99g
Tilapia	114g
Tuna (canned)	125g
Turkey breast	103g
Yogurt, plain, nonfat	513g

Grain & Starch

Bagel	149g
Beans (any on list)	315g
Cheerios	101g

How much body fat is right for you is a personal choice. If you have more body fat than you personally want, your Burn & Build plan gives you a path toward changing it.

Desirable lean body mass for your height is 156 pounds or more.

156.0 lbs lean body mass

Your LBM is at or above the desirable amount for your height.

Why Lean Body Mass Matters

Lean body mass (predominantly muscle) is your strength, your energy, and your true body shape under your fat. It's your muscle, bones, organs, skin, hair, and hormones.

Actually, it's you.

Eating to keep your muscle (LBM) is a solid move toward being as healthy and vibrant as possible. When your lean mass is gone, you are gone.

AT YOUR CURRENT 156.0 LBS OF LEAN MASS

Here are the body weights corresponding to the different body-fat ranges.

VERY LEAN	LEAN	AVERAGE	ABOVE AVERAGE	HIGH
166-179 lbs.	180-189 lbs.	189-206 lbs.	207-228 lbs.	229 lbs. or more

RECHECK YOUR PROGRESS

Recheck your body composition every 6–8 weeks. The goal is to see fat coming down while protecting your lean body mass, strength and energy.

QUESTIONNAIRE **CONFIRMATION**

These are the answers used to build your personalized food plan.

1. What is your full name?	Sample Diet
2. What is your gender?	male
3. What is your email address?	sample@burnandbulddiet.com
4. Who do we thank?	My BFF
5. How physically active is your job?	Sitting
6. Your life outside work & training hours	Comfortable
7. Age?	35
8. How many hours per week of Weights/Racquet Sports?	3
9. How many hours per week in your cardio training range?	3
10. How many hours per week in your fat burning training range?	3
11. What is your height?	5'9"
12. What is your weight?	208 lbs
13. What is your body fat percentage?	25%
14. How do you know?	I'm estimating
15. Approved	<i>Sample Diet</i> — 08 / 30 / 2026
