## Welcome

Congratulations! You have in your hands the most advanced diet available anywhere, at any price. It is the most individualized program available for losing fat. This diet will not work effectively for anyone else because it has been created just for you, using your lean body mass (LBM), your job, your day to day, and your weekly plan for weight training (WT), high heart rate aerobic activity (HHT), and low heart rate aerobic activity (LHR).

How we did it. We determined your lean weight using sophisticated body composition testing. Then you told us about your job, day to day, and exercise hours. With this information, the computer generated this report. Page two is your Lean Body Analysis; the pages that follow are your projections and custom-designed diet.

### Lean Body Analysis

Page two is the results of your body composition test. Although very few people want to know how fat they are, all of them want to know how to lose fat. Our Lean Body Analysis page includes a breakdown of your current body composition with an emphasis on the good stuff. LBM (lean body mass) is used by the computer to calculate your metabolic rate (RMR). In addition, the Lean Body Analysis projects appropriate weight goals based on your current lean body mass.

### Projections

Pages three and four are your Projections. They bring together your lean body mass (LBM), your job, your day to day, and the hours you plan to spend on weight training (WT), high heart rate aerobic activity (HHT), and low heart rate aerobic activity (LHR) — the same inputs the computer uses to build your food plan. The timeline table shows your projected fat and body fat % over the next eight weeks.

### Food Plan

Page five is your custom-designed food plan. We use your body composition information to determine your LBM (lean body mass), then factor in your job, your day to day, and how many hours per week you spend on weight training (WT), high heart rate aerobic work (HHT) such as running or hard cardio, and low heart rate aerobic work (LHR) such as walking or easy cycling. The page shows how much fat you can lose in eight weeks, compares your body today with your eight-week goal, and explains what happens when protein, carbohydrates, or fat are too high or too low — so the servings on the next page make sense without counting grams.

### Servings

Page six is the servings page. No need to count calories or macronutrients (protein, carbohydrates, and fat) yourself. The computer turns everything from page five into daily servings divided across breakfast, lunch, dinner, and snacks — so you have maximum strength and energy while losing fat as fast as this plan allows.

# Lean Body Analysis

Height: 66 inches Sex: FEMALE Body comp: Skinfolds Age: 28 years of experience

--TODAY--

|       |          |            |
|-------|----------|------------|
| LEAN  | 61.78 %  | 113.7 lbs. |
| FAT   | 38.22 %  | 70.3 lbs.  |
| TOTAL | 100.00 % | 184.0 lbs. |

BODY FAT **PROGRESS BAR**  
WHERE YOU ARE. WHERE YOU'RE HEADED.

A female your height in good condition has 106 pounds or more of lean body weight. Lean body mass is everything in your body that is not fat — muscle, bone, organs, and fluids. It drives metabolism. Burn & Build is built to reduce fat while protecting that lean tissue. How much fat is right for you is a personal choice. How you look in the mirror is the only true judge of whether you're where you want to be.

CONGRATULATIONS! Your LBM is at or above the desirable amount. Even so, it's a good idea to exercise at least twice a week. If you want to gain lean or maybe just tone and shape your body, do so by participating in a weight-training program two to three times a week under the guidance of an experienced trainer. The table below tells us what you would weigh for the different health categories based on your current Lean Body Mass. Increasing or decreasing your LBM would increase or decrease the suggested body weight accordingly. For maximum success, feed your body properly. This diet will show you how much food you need daily for maximum results.

Continue to monitor your body composition using Lean Body Analysis every 6 to 8 weeks to make sure you are losing only fat and not lean! If you want to lose fat, do so by following this diet as closely as you can. This plan allows you to lose all the fat you want to lose while increasing your strength & energy.

# Projections

| FAT LOSS                                                                          | BODY FAT %       | TIMELINE |
|-----------------------------------------------------------------------------------|------------------|----------|
|  | 38.22% to 34.29% | 8 weeks  |

The following food program contains a sophisticated calculation that is based on your individual lean body mass (LBM), and on your activities. This is the most individualized food program available for losing fat and building muscle. In your questionnaire, you indicated you plan to exercise a total of 6.00 hour(s) per week. 3.00 hour(s) of weight training, 0.00 hour(s) of cardiovascular activities, 3.00 hour(s) of fat-burning activities

| LBM                 | JOB                 |        |         | DAY TO DAY          |      |           |
|---------------------|---------------------|--------|---------|---------------------|------|-----------|
| 113.7 lbs           | Sitting             | Moving | Lifting | Comfortable         | Busy | Stressful |
| WT                  | HHT                 |        |         | LHR                 |      |           |
| 3.00 hours per week | 0.00 hours per week |        |         | 3.00 hours per week |      |           |

The burn engine uses the information above to calculate your RMR (resting metabolic rate). In other words how much protein, carbohydrates and fat do use every day. Now the burn engine can calculates how much body fat you can safely lose per day. The table below shows you projected body weight and fat% every eight weeks. Use this table to determine when to start your Burn & Build diet to reach your goal on time. Showtime is the extreme bodybuilder competition look. Dont panic the good news here is the look you want is somewhere between where you are now and Showtime. When you look like you want to look ease up on the diet. If you drift back up. Tighten up the diet. Fine tuning day to ay week to week keeps looking great year round. and heres to best part of all. You can do this without counting calories or tracking macros because the Burn & Build engine shows you exactly what you need to eat to reach your goal.

| BODYWEIGHT | TIMELINE   | BODY FAT %       |
|------------|------------|------------------|
| 184 lbs    | Current    | 38.22%           |
| 173.0 lbs  | 8 weeks    | 34.28%           |
| 162.0 lbs  | 16 weeks   | 29.81%           |
| 151.0 lbs  | 24 weeks   | 24.70%           |
| 140.0 lbs  | 32 weeks   | 18.79%           |
| 129.0 lbs  | 40 weeks   | 11.86%           |
| 123.9 lbs  | 43.7 weeks | 8.95% (Showtime) |

---

# Food Plan

We have been converting macros since 1982.

The challenge with macros is slippage.

## Step 4 — Turn targets into servings

The computer calculated your daily food targets, then converted them into servings — protein, grains, vegetables, fruits, and fats.

You follow servings, not calories. The math is already done. Your job is to pick foods from the approved food list and hit your daily totals.

| THE MACROS    | TOO MUCH | TOO LITTLE        |
|---------------|----------|-------------------|
| PROTEIN       | GAIN FAT | LOSE LBM (MUSCLE) |
| CARBOHYDRATES | GAIN FAT | LOSE ENERGY       |
| FAT           | GAIN FAT | LOSE FAT          |

# Servings

NOTE: Always consult your physician before starting this plan or making any change in your eating habits.

|                 | Daily | Breakfast | Snack | Lunch | Snack | Dinner | Snack |
|-----------------|-------|-----------|-------|-------|-------|--------|-------|
| Protein         | 9     | 3         |       | 3     |       | 3      |       |
| Grains/Starches | 9     | 3         |       | 3     |       | 3      |       |
| Veggies         | 1     |           |       |       |       |        |       |
| Fruits          | 3     |           | 1     |       | 1     |        | 1     |

# Food List

## Protein Staples

|                                 |          |
|---------------------------------|----------|
| 1% milk                         | 705g     |
| Chicken breast                  | 78g      |
| Cod                             | 105g     |
| Cottage cheese, 1%              | 219g     |
| Cottage cheese, 2%              | 219g     |
| Cottage cheese, nonfat          | 234g     |
| Egg whites (extra large)        | 6 whites |
| Egg whites (small)              | 9 whites |
| Eye of round                    | 81g      |
| Greek yogurt, lowfat            | 240g     |
| Lactose-free skim milk          | 705g     |
| Lean ground beef (ground round) | 81g      |
| Plain Greek yogurt, nonfat      | 234g     |
| Ricotta, nonfat                 | 210g     |
| Shrimp                          | 99g      |
| Sirloin steak                   | 81g      |
| Skim milk                       | 705g     |
| Tilapia                         | 93g      |
| Tuna (canned)                   | 102g     |
| Turkey breast                   | 84g      |
| Yogurt, plain, nonfat           | 420g     |

## Grains & Starches

|                             |      |
|-----------------------------|------|
| Bagel                       | 84g  |
| Beans (any on list)         | 177g |
| Cheerios                    | 57g  |
| Corn grits                  | 54g  |
| Corn, sweet                 | 195g |
| Cream of Wheat (dry)        | 54g  |
| English muffin              | 96g  |
| Farina (dry)                | 54g  |
| French bread                | 81g  |
| Hard roll                   | 81g  |
| Mixed peas and carrots      | 420g |
| Multigrain bread            | 96g  |
| Oatmeal (dry)               | 63g  |
| Pasta (cooked)              | 168g |
| Pasta, whole wheat (cooked) | 159g |
| Peas, green                 | 270g |
| Peas, split                 | 204g |
| Pita (pocket)               | 75g  |
| Popcorn (air popped)        | 54g  |
| Potato, baked (with skin)   | 198g |
| Potato, boiled              | 210g |
| Quinoa (cooked)             | 198g |
| Rice, brown (cooked)        | 180g |
| Rice, white (cooked)        | 150g |
| Rye bread                   | 87g  |
| Sweet potato                | 204g |
| Tortilla, corn (6-inch)     | 93g  |
| Tortilla, whole wheat       | 93g  |
| Whole wheat bread           | 102g |
| Whole wheat roll            | 81g  |

## Vegetables

|                                      |      |
|--------------------------------------|------|
| Asparagus (cooked) .....             | 256g |
| Asparagus (raw) .....                | 256g |
| Bell peppers, orange (cooked) .....  | 149g |
| Bell peppers, orange (raw) .....     | 167g |
| Bell peppers, red (cooked) .....     | 149g |
| Bell peppers, red (raw) .....        | 167g |
| Bell peppers, yellow (cooked) .....  | 149g |
| Bell peppers, yellow (raw) .....     | 167g |
| Broccoli (cooked) .....              | 139g |
| Broccoli (raw) .....                 | 152g |
| Carrots (cooked) .....               | 122g |
| Carrots (raw) .....                  | 104g |
| Cauliflower (cooked) .....           | 244g |
| Cauliflower (raw) .....              | 200g |
| Cucumbers (raw) .....                | 278g |
| Green beans (cooked) .....           | 143g |
| Green beans (raw) .....              | 143g |
| Mushrooms, white (cooked) .....      | 189g |
| Mushrooms, white (raw) .....         | 303g |
| Spinach (cooked) .....               | 263g |
| Spinach (raw) .....                  | 278g |
| Squash, summer (yellow) (raw) .....  | 294g |
| Squash, winter (hubbard) (raw) ..... | 115g |
| Squash, zucchini (raw) .....         | 323g |
| Tomatoes (cooked) .....              | 250g |
| Tomatoes (raw) .....                 | 256g |

## Fruit

|                                   |      |
|-----------------------------------|------|
| Apples (raw) .....                | 130g |
| Bananas (raw) .....               | 79g  |
| Blueberries (raw) .....           | 124g |
| Cantaloupe (raw) .....            | 220g |
| Clementines (raw) .....           | 150g |
| Dried plums (pitted prunes) ..... | 28g  |
| Grapes (raw) .....                | 99g  |
| Pineapple (raw) .....             | 137g |
| Strawberries (raw) .....          | 234g |
| Tangerines (raw) .....            | 135g |
| Watermelon (raw) .....            | 237g |

# Seasonings And Splashes

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                 |
