## Welcome

Congratulations! You have in your hands the most advanced diet available anywhere, at any price. It is the most individualized program available for losing fat. This diet will not work effectively for anyone else because it has been created just for you, using your LBM, your job, your lifestyle and your daily plan for exercise & activities.

How we did it. We determined your lean weight using sophisticated body composition testing. Then you told us about your job, lifestyle, exercise and activities. With this information, the computer generated this four-page report. Included is your ultrasound body composition report that I call your Lean Body Analysis, and the last two pages are your custom designed diet.

### Lean Body Analysis

Page two is the results of your body composition test. Although very few people want to know how fat they are, all of them want to how to lose fat. Our Lean Body Analysis page includes a breakdown of your current body composition with an emphasis on the good stuff. LBM (lean body mass) is used by the computer to calculate your metabolic rate (RMR). In addition, the Lean Body Analysis projects appropriate weight goals based on your current lean body mass.

### Food Plan

Page three is your custom-designed diet. How much food you need each day depends on how much LBM you have, your job, lifestyle and the type and amount of exercise you participate in. Based on the information you provide, this diet gives you the amount of protein, carbohydrates and fat you need per day to lose fat. It also tells you how much fat you can lose in eight weeks. And it shows you what your body requires at rest (your resting metabolic rate), for your workday and for one hour of each type of exercise.

### Servings

Page four is the servings page. No need to count calories or macros in this diet. The computer breaks down all the information from the table on page three and shows you the number of servings you need daily to have maximum strength & energy and to lose fat as fast as possible.

# Lean Body Analysis

Height: 66 inches Sex: FEMALE Thigh: 25 mm Waist: 25 mm Age: 28 years of experience

--TODAY--

|                                                                      |                                                                    |                                                                            |
|----------------------------------------------------------------------|--------------------------------------------------------------------|----------------------------------------------------------------------------|
| <div>Lean weight</div> <div>113.7 lbs</div> <div>61.78% of you</div> | <div>Fat weight</div> <div>70.3 lbs</div> <div>38.22% of you</div> | <div>Total weight</div> <div>184.0 lbs</div> <div>on the scale today</div> |
|----------------------------------------------------------------------|--------------------------------------------------------------------|----------------------------------------------------------------------------|

| Extreme   | Healthy    | Average    | Borderline | At Risk    |
|-----------|------------|------------|------------|------------|
| 9%-13.99% | 14%-20.99% | 21%-25.99% | 26%-31.99% | Over 32 +% |

According to the American Council on Exercise you are at risk based on your current fat percentage.

How much fat is right for each individual is a personal choice. How you look in the mirror is the only true judge of whether you have fat to lose. If you see more fat than you personally want, then exercise and follow your this plan until you reach your desired goals.

A female your height in good condition has 106 pounds or more of lean body weight.

CONGRATULATIONS! Your LBM is at or above the desirable amount. Even so, it's a good idea to exercise at least twice a week. If you want to gain lean or maybe just tone and shape your body, do so by participating in a weight-training program two to three times a week under the guidance of an experienced trainer. The table below tells us what you would weigh for the different health categories based on your current Lean Body Mass. Increasing or decreasing your LBM would increase or decrease the suggested body weight accordingly. For maximum success, feed your body properly. This diet will show you how much food you need daily for maximum results.

| Extreme      | Healthy      | Average      | Borderline   | At Risk          |
|--------------|--------------|--------------|--------------|------------------|
| 125-130 lbs. | 131-143 lbs. | 144-152 lbs. | 153-167 lbs. | 167 lbs. or more |

Continue to monitor your body composition using Lean Body Analysis every 6 to 8 weeks to make sure you are losing only fat and not lean! If you want to lose fat, do so by following this diet as closely as you can. This plan allows you to lose all the fat you want to lose while increasing your strength & energy.

# Food Plan

The following food program contains a sophisticated calculation that is based on your individual lean body mass (LBM), and on your activities. This is the most individualized food program available for losing fat. In eight weeks, you could safely lose 11.0 pounds of fat. On your information sheet, you indicated you plan to exercise a total of 6.00 hour(s) per week. 3.00 hour(s) of weight training, 0.00 hour(s) of cardiovascular activities, 3.00 hour(s) of fat-burning activities

|       | TODAY   |            |                   | EIGHT WEEK GOAL |            |
|-------|---------|------------|-------------------|-----------------|------------|
| LEAN  | 61.78%  | 113.7 lbs. |                   | 65.71%          | 113.7 lbs. |
| FAT   | 38.22%  | 70.3 lbs.  | -11.0 lbs. of fat | 34.29%          | 59.3 lbs.  |
| TOTAL | 100.00% | 184.0 lbs. |                   | 100.00%         | 173.0 lbs. |

You project to lose an average of 1.3 pounds of fat per week. In addition, you could gain lean weight. Gaining lean weight will increase your strength and energy and offset your fat loss.

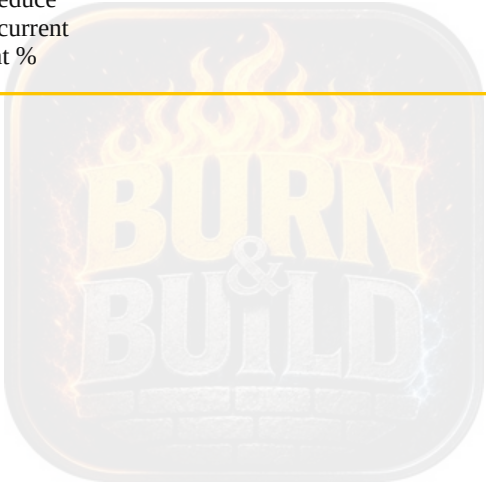

Each macronutrient affects your body differently. Getting too much or too little of protein, carbohydrates, or fat can work against your goals. The table below shows what to watch for on each one.

| THE MACROS                                                                                               | TOO MUCH              | TOO LITTLE                     |
|----------------------------------------------------------------------------------------------------------|-----------------------|--------------------------------|
|  <b>PROTEIN</b>       | <b>GAIN FAT</b><br>!“ | <b>LOSE LBM (MUSCLE)</b><br>!“ |
|  <b>CARBOHYDRATES</b> | <b>GAIN FAT</b><br>!“ | <b>LOSE ENERGY</b><br>!“       |
|  <b>FAT</b>           | <b>GAIN FAT</b><br>!“ | <b>LOSE FAT</b><br>!“          |

# Servings

NOTE: Always consult your physician before starting this plan or making any change in your eating habits.

|                 | Daily | Breakfast                      | Snack | Lunch | Snack | Dinner | Snack |
|-----------------|-------|--------------------------------|-------|-------|-------|--------|-------|
| Protein         | 9     | 3                              |       | 3     |       | 3      |       |
| Grains/Starches | 9     | 3                              |       | 3     |       | 3      |       |
| Veggies         | 1     |                                |       |       |       |        |       |
| Fruits          | 3     |                                | 1     |       | 1     |        | 1     |

| Mushrooms, white (cooked) .....     | 189g |
| Mushrooms, white (raw) .....        | 303g |
| Spinach (cooked) .....              | 263g |
| Spinach (raw) .....                 | 278g |
| Tomatoes (cooked) .....             | 250g |
| Tomatoes (raw) .....                | 256g |

## Fruit

|                          |      |
|--------------------------|------|
| Apples (raw) .....       | 130g |
| Bananas (raw) .....      | 79g  |
| Blueberries (raw) .....  | 124g |
| Clementines (raw) .....  | 150g |
| Grapes (raw) .....       | 99g  |
| Pineapple (raw) .....    | 137g |
| Strawberries (raw) ..... | 234g |
| Tangerines (raw) .....   | 135g |
| Watermelon (raw) .....   | 237g |

## Flavor Kits

### Fire

- Chili powder
- Cumin
- Garlic powder
- Salt
- Black pepper

### Iron

- Salt
- Black pepper
- Garlic powder
- Onion powder

### Green

- Lemon pepper
- Garlic
- Dried basil

### Earth

- Sage
- Thyme
- Black pepper
- Mustard powder

## Splashes

- Low-sodium soy sauce
- Mustard
- Salsa
- Vinegar
- Hot sauce
- Lemon juice
- Lime juice

## Pantry

- Cooking spray
- Nonstick foil
- Coffee
- Tea
- Zero-calorie beverages

Flavor kits don't count toward protein or G/S servings.

Splashes are liquids used while cooking — normal amounts, not a beverage.
