

Personalized exclusively for: Kristi Warner

On: January 15th, 2024

Welcome

Congratulations! You have in your hands the most advanced diet available anywhere, at any price. It is the most individualized program available for losing fat. This diet will not work effectively for anyone else because it has been created just for you, using your lean body mass (LBM), your job, your day to day, and your weekly plan for weight training (WT), high heart rate aerobic activity (HHT), and low heart rate aerobic activity (LHR).

How we did it. We determined your lean weight using sophisticated body composition testing. Then you told us about your job, day to day, and exercise hours. With this information, Burn & Build generated this report. Page two is your Lean Body Analysis, including your projected progress; the pages that follow are your food plan, servings, and food list.

Lean Body Analysis

Page two is the results of your body composition test. Although very few people want to know how fat they are, all of them want to know how to lose fat. Our Lean Body Analysis page includes your profile, a snapshot of where you are today, and a Projected Progress bar — where you are and where you are headed. Burn & Build uses your LBM (lean body mass) to calculate your metabolic rate (RMR). The bar shows appropriate weight goals for each leanness stage and projected body fat over time, based on your current lean body mass.

Food Plan

Page three is your custom-designed food plan. It explains why servings go a step farther than macros and how tracking macros can lead you astray. The servings on page four follow directly from this page.

Servings

Page four is the servings page. Burn & Build turns everything from page three into daily servings divided across breakfast, lunch, dinner, and fruit so you have maximum strength and energy while losing fat as fast as this plan allows.

Food List

Pages five and six are your food list. Page five lists protein, grains, and starches. Page six lists vegetables and fruit. These foods were chosen from the bodybuilder cutting-diet staples used in Warner 1982 — foods that work in real prep. Each item is matched to Burn Engine serving rules and sized with USDA nutrition data so one serving delivers the protein, carbohydrate, or produce your plan calls for. The gram weights on your list are scaled to your daily servings from page four. Weigh your portions, stay inside your servings, and build meals from these approved foods.

Lean Body Analysis

HEIGHT	SEX	BODY COMP	AGE
66 in.	FEMALE	Skinfolds	28 years
TODAY			
	%		lbs.
LEAN	61.78%		113.7 lbs.
FAT	38.22%		70.3 lbs.
TOTAL	100.00%		184.0 lbs.

PROJECTED PROGRESS

WHERE YOU ARE. WHERE YOU'RE HEADED.

CONGRATULATIONS! Your LBM is at or above the desirable amount.

A female your height in good condition has 106 pounds or more of lean body weight. Lean body mass is everything in your body that is not fat — muscle, bone, organs, and fluids. It drives metabolism. Burn & Build is built to reduce fat while protecting that lean tissue. How much fat is right for you is a personal choice. How you look in the mirror is the only true judge of whether you're where you want to be.

Food Plan

Macros are considered to be the end all, be all, in the nutrition world. But knowing your macros still means you need to figure out what to eat. Since 1982 Burn & Build has been converting macros to servings using proven fat burning muscle building foods. For the best results you need a plan that goes a step farther than macros.

Protein, carbohydrates, and fat each support lean mass, energy, and fat loss.

The table below shows how tracking macros might lead you astray. Or answer this question. Are you puzzled why your exercising isn't working?

Burn & Build cuts the fine line between too much and too little and that's the secret to losing fat and building muscle on the same diet.

FOOD GROUPS	TOO MUCH	TOO LITTLE
PROTEIN	GAIN FAT	LOSE LBM (MUSCLE)
CARBOHYDRATES	GAIN FAT	LOSE ENERGY
FAT	GAIN FAT	LOSE FAT

Burn & Build converted the proteins and carbohydrates into servings from protein, dairy, grains, starches, veggies and fruits. All whole clean food choices. Each food on the list is sized to fit your needs. This program is customized to you and won't work for anyone else. And although it's not easy it is simple.

Servings

NOTE: Always consult your physician before starting this plan or making any change in your eating habits.

	Daily	Breakfast	Fruit	Lunch	Fruit	Dinner	Fruit
Protein	9	3		3		3	
Grains/Starches	9	3		3		3	
Veggies	1						
Fruits	3		1		1		1
Extra fat, sugar and alcohol	18			To maintain your current fat %			
	0			To reduce your current fat %			

Pull out your kitchen scale. Don't have one. Order one on Amazon. About \$50.

Set the scale to grams, not ounces. Grams are a more accurate measurement, down to the weight of a paper clip. We don't guesstimate.

Put your plate on the scale and zero the weight. Now we can build our meal.

Your food list is on pages 5 and 6. Page 5 has protein, dairy, grains, and starches. Page 6 has vegetables and fruit.

Step 1 Choose your protein from the protein & dairy list on page 5. Find the serving size for that food. Add that exact amount to your plate.

Step 2 Zero your scale again. Find the carbohydrate you want from the grain & starch food list on page 5. Add that exact amount to your plate.

Step 3 Veggies are optional. They are good for you but take up valuable space in your stomach. Remember this is an eating plan, not a not-eating plan. Zero your scale. Add the exact amount of veggies from page 6 to your plate (if desired).

Your plate will be piled high with the right amount of protein and carbs to fuel your life for the next couple of hours.

Repeat this process for breakfast, lunch, and dinner.

Do the same process for fruit on page six. Convenience tip: eat the same fruit for all three fruit servings. It's easier to clean three fruit servings at one time than three different fruits every day.

For maximum results, do three things every day:

1. Eat all the servings recommended. Eating less will cause muscle loss and slow fat burning.
2. Alternate protein/carb meals with fruit.
3. Eat every three hours or sooner. Set a timer to help you get in the groove.

Most people quit in the first three days. By day four they're in the groove, and by day 7–10 they are feeling the changes.

Summed up: the key to success is fill your plate, empty your plate.

Food List

Protein & Dairy

1% milk	705g
Chicken breast	78g
Cod	105g
Cottage cheese, 1%	219g
Cottage cheese, 2%	219g
Cottage cheese, nonfat	234g
Egg whites (extra large)	6 whites
Egg whites (small)	9 whites
Eye of round	81g
Greek yogurt, lowfat	240g
Lactose-free skim milk	705g
Lean ground beef (ground round)	81g
Plain Greek yogurt, nonfat	234g
Ricotta, nonfat	210g
Shrimp	99g
Sirloin steak	81g
Skim milk	705g
Tilapia	93g
Tuna (canned)	102g
Turkey breast	84g
Yogurt, plain, nonfat	420g

Grains & Starches

Bagel	84g
Beans (any on list)	177g
Cheerios	57g
Corn grits	54g
Corn, sweet	195g
Cream of Wheat (dry)	54g
English muffin	96g
Farina (dry)	54g
French bread	81g
Hard roll	81g
Mixed peas and carrots	420g
Multigrain bread	96g
Oatmeal (dry)	63g
Pasta (cooked)	168g
Pasta, whole wheat (cooked)	159g
Peas, green	270g
Peas, split	204g
Pita (pocket)	75g
Popcorn (air popped)	54g
Potato, baked (with skin)	198g
Potato, boiled	210g
Quinoa (cooked)	198g
Rice, brown (cooked)	180g
Rice, white (cooked)	150g
Rye bread	87g
Sweet potato	204g
Tortilla, corn (6-inch)	93g
Tortilla, whole wheat	93g
Whole wheat bread	102g
Whole wheat roll	81g

Food List

Vegetables

Asparagus (cooked)	256g
Asparagus (raw)	256g
Bell peppers, orange (cooked)	149g
Bell peppers, orange (raw)	167g
Bell peppers, red (cooked)	149g
Bell peppers, red (raw)	167g
Bell peppers, yellow (cooked)	149g
Bell peppers, yellow (raw)	167g
Broccoli (cooked)	139g
Broccoli (raw)	152g
Carrots (cooked)	122g
Carrots (raw)	104g
Cauliflower (cooked)	244g
Cauliflower (raw)	200g
Cucumbers (raw)	278g
Green beans (cooked)	143g
Green beans (raw)	143g
Mushrooms, white (cooked)	189g
Mushrooms, white (raw)	303g
Spinach (cooked)	263g
Spinach (raw)	278g
Squash, summer (yellow) (raw)	294g
Squash, winter (hubbard) (raw)	115g
Squash, zucchini (raw)	323g
Tomatoes (cooked)	250g
Tomatoes (raw)	256g

Fruit

Apples (raw)	130g
Bananas (raw)	79g
Blueberries (raw)	124g
Cantaloupe (raw)	220g
Clementines (raw)	150g
Dried plums (pitted prunes)	28g
Grapes (raw)	99g
Pineapple (raw)	137g
Strawberries (raw)	234g
Tangerines (raw)	135g
Watermelon (raw)	237g
