## Welcome

Congratulations! You have in your hands the most advanced diet available anywhere, at any price. It is the most individualized program available for losing fat. This diet will not work effectively for anyone else because it has been created just for you, using your lean body mass (LBM), your job, your lifestyle, and your weekly plan for weight training (WT), high heart rate aerobic activity (HHT), and low heart rate aerobic activity (LHR).

How we did it. We determined your lean weight using sophisticated body composition testing. Then you told us about your job, lifestyle, and exercise hours. With this information, the computer generated this report. Included is your ultrasound body composition report that I call your Lean Body Analysis, and the following pages are your custom-designed diet.

### Lean Body Analysis

Page two is the results of your body composition test. Although very few people want to know how fat they are, all of them want to know how to lose fat. Our Lean Body Analysis page includes a breakdown of your current body composition with an emphasis on the good stuff. Lean body mass (LBM) — everything in you except fat — is used by the computer to calculate your resting metabolic rate (RMR), the calories your body burns at rest. The Lean Body Analysis also projects appropriate weight goals based on your current lean body mass.

### Food Plan

Page three is your custom-designed food plan. We use your body composition information to determine your LBM (lean body mass), then factor in your job, your day-to-day pace, and how many hours per week you spend on weight training (WT), high heart rate aerobic work (HHT) such as running or hard cardio, and low heart rate aerobic work (LHR) such as walking or easy cycling. The page shows how much fat you can lose in eight weeks, compares your body today with your eight-week goal, and explains what happens when protein, carbohydrates, or fat are too high or too low — so the servings on the next page make sense without counting grams.

### Servings

Page four is the servings page. No need to count calories or macronutrients (protein, carbohydrates, and fat) yourself. The computer turns everything from page three into daily servings divided across breakfast, lunch, dinner, and snacks — so you have maximum strength and energy while losing fat as fast as this plan allows.

# Projections

The following food program contains a sophisticated calculation that is based on your individual lean body mass (LBM), and on your activities. This is the most individualized food program available for losing fat and building muscle. In your questionnaire, you indicated you plan to exercise a total of 6.00 hour(s) per week. 3.00 hour(s) of weight training, 0.00 hour(s) of cardiovascular activities, 3.00 hour(s) of fat-burning activities

|                                                    |                                                              |                                                                       |                                                                      |
|----------------------------------------------------|--------------------------------------------------------------|-----------------------------------------------------------------------|----------------------------------------------------------------------|
| <b>Lean body mass (LBM)</b><br><b>113.7</b><br>lbs | <b>Weight training (WT)</b><br><b>3.00</b><br>hours per week | <b>High heart rate aerobic (HHT)</b><br><b>0.00</b><br>hours per week | <b>Low heart rate aerobic (LHR)</b><br><b>3.00</b><br>hours per week |
|----------------------------------------------------|--------------------------------------------------------------|-----------------------------------------------------------------------|----------------------------------------------------------------------|

Job: Mostly sitting · Day-to-day pace: Comfortable · Workday activity level: 1.5 — how much energy a typical workday adds above resting (higher means more physical work or stress; set from your job and day-to-day pace answers)

| Bodyweight | Timeline   | Body Fat %       |
|------------|------------|------------------|
| 184 lbs    | Current    | 38.22%           |
| 173.0 lbs  | 8 weeks    | 34.28%           |
| 162.0 lbs  | 16 weeks   | 29.81% (Average) |
| 151.0 lbs  | 24 weeks   | 24.70%           |
| 140.0 lbs  | 32 weeks   | 18.79%           |
| 129.0 lbs  | 40 weeks   | 11.86%           |
| 123.9 lbs  | 43.7 weeks | 8.95% (Showtime) |

---

# Food Plan

We use your body composition information to determine your LBM (lean body mass) — the weight of everything in your body except fat, mostly muscle and organs. The computer uses your LBM to set your protein needs and your metabolic rate. You also told us how you work and train: weight training (WT), high heart rate aerobic activity (HHT) such as running or hard cardio, and low heart rate aerobic activity (LHR) such as walking or easy cycling. Those hours, together with your job and lifestyle, are the inputs that build your food plan and your servings on the next page.

Macronutrients — protein, carbohydrates, and fat — are the three main parts of food that supply calories and shape body composition. The table below is not a food list; it explains what happens when each macro is too high or too low. That is why your daily servings on the next page are set the way they are: so you stay in the right range without counting grams yourself.

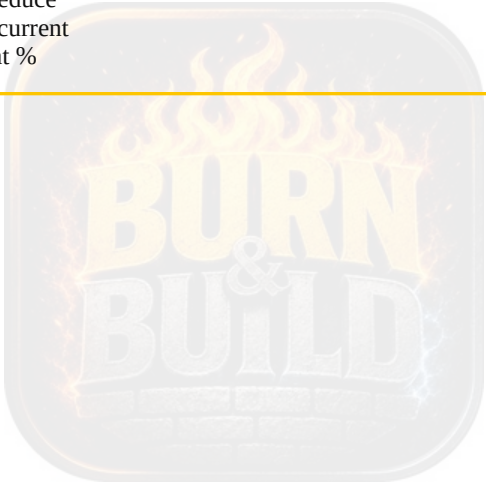

| Macro         | Too much | Too little                   |
|---------------|----------|------------------------------|
| Protein       | Gain fat | Lose lean body mass (muscle) |
| Carbohydrates | Gain fat | Lose energy between meals    |
| Fat           | Gain fat | Slow fat loss                |

# Servings

NOTE: Always consult your physician before starting this plan or making any change in your eating habits.

|                 | Daily | Breakfast                      | Snack | Lunch | Snack | Dinner | Snack |
|-----------------|-------|--------------------------------|-------|-------|-------|--------|-------|
| Protein         | 9     | 3                              |       | 3     |       | 3      |       |
| Grains/Starches | 9     | 3                              |       | 3     |       | 3      |       |
| Veggies         | 1     |                                |       |       |       |        |       |
| Fruits          | 3     |                                | 1     |       | 1     |        | 1     |
| Extra Fats      | 18    | To maintain your current fat % |       |       |       |        |       |
|                 | 0     | To reduce your current fat %   |       |       |       |        |       |

# Food List

## Protein Staples

|                                       |          |
|---------------------------------------|----------|
| 1% milk .....                         | 235g     |
| Chicken breast .....                  | 26g      |
| Cod .....                             | 35g      |
| Cottage cheese, 1% .....              | 73g      |
| Cottage cheese, 2% .....              | 73g      |
| Cottage cheese, nonfat .....          | 73g      |
| Egg whites (extra large) .....        | 2 whites |
| Egg whites (small) .....              | 3 whites |
| Eye of round .....                    | 25g      |
| Greek yogurt, lowfat .....            | 84g      |
| Lactose-free skim milk .....          | 237g     |
| Lean ground beef (ground round) ..... | 27g      |
| Plain Greek yogurt, nonfat .....      | 78g      |
| Ricotta, nonfat .....                 | 73g      |
| Shrimp .....                          | 33g      |
| Sirloin steak .....                   | 28g      |
| Skim milk .....                       | 237g     |
| Tilapia .....                         | 31g      |
| Tuna (canned) .....                   | 34g      |
| Turkey breast .....                   | 28g      |
| Yogurt, plain, nonfat .....           | 140g     |

## Grains & Starches

|                                   |      |
|-----------------------------------|------|
| Bagel .....                       | 25g  |
| Beans (any on list) .....         | 66g  |
| Cheerios .....                    | 19g  |
| Corn grits .....                  | 23g  |
| Corn, sweet .....                 | 17g  |
| Cream of Wheat (dry) .....        | 19g  |
| English muffin .....              | 31g  |
| Farina (dry) .....                | 19g  |
| French bread .....                | 25g  |
| Hard roll .....                   | 23g  |
| Mixed peas and carrots .....      | 139g |
| Multigrain bread .....            | 29g  |
| Oatmeal (dry) .....               | 22g  |
| Pasta (cooked) .....              | 61g  |
| Pasta, whole wheat (cooked) ..... | 61g  |
| Peas, green .....                 | 83g  |
| Peas, split .....                 | 126g |
| Pita (pocket) .....               | 24g  |
| Popcorn (air popped) .....        | 36g  |
| Potato, baked (with skin) .....   | 86g  |
| Potato, boiled .....              | 96g  |
| Quinoa (cooked) .....             | 66g  |
| Rice, brown (cooked) .....        | 55g  |
| Rice, white (cooked) .....        | 58g  |
| Rye bread .....                   | 27g  |
| Squash, summer (yellow) .....     | 325g |
| Squash, winter (hubbard) .....    | 160g |
| Squash, zucchini .....            | 479g |
| Sweet potato .....                | 55g  |
| Tortilla, corn (6-inch) .....     | 31g  |
| Tortilla, whole wheat .....       | 19g  |
| Whole wheat bread .....           | 29g  |
| Whole wheat roll .....            | 27g  |

# Food List

## Vegetables

|                                     |      |
|-------------------------------------|------|
| Asparagus (cooked) .....            | 244g |
| Asparagus (raw) .....               | 256g |
| Bell peppers, orange (cooked) ..... | 118g |
| Bell peppers, orange (raw) .....    | 117g |
| Bell peppers, red (cooked) .....    | 159g |
| Bell peppers, red (raw) .....       | 167g |
| Bell peppers, yellow (cooked) ..... | 159g |
| Bell peppers, yellow (raw) .....    | 159g |
| Broccoli (cooked) .....             | 139g |
| Broccoli (raw) .....                | 152g |
| Carrots (cooked) .....              | 122g |
| Carrots (raw) .....                 | 104g |
| Cauliflower (cooked) .....          | 244g |
| Cauliflower (raw) .....             | 200g |
| Cucumbers (raw) .....               | 278g |
| Green beans (cooked) .....          | 141g |
| Green beans (raw) .....             | 141g |
| Mushrooms, white (cooked) .....     | 189g |
| Mushrooms, white (raw) .....        | 303g |
| Spinach (cooked) .....              | 263g |
| Spinach (raw) .....                 | 278g |
| Tomatoes (cooked) .....             | 250g |
| Tomatoes (raw) .....                | 256g |

## Fruit

|                          |      |
|--------------------------|------|
| Apples (raw) .....       | 130g |
| Bananas (raw) .....      | 79g  |
| Blueberries (raw) .....  | 124g |
| Clementines (raw) .....  | 150g |
| Grapes (raw) .....       | 99g  |
| Pineapple (raw) .....    | 137g |
| Strawberries (raw) ..... | 234g |
| Tangerines (raw) .....   | 135g |
| Watermelon (raw) .....   | 237g |

## Flavor Kits

### Fire

- Chili powder
- Cumin
- Garlic powder
- Salt
- Black pepper

### Iron

- Salt
- Black pepper
- Garlic powder
- Onion powder

### Green

- Lemon pepper
- Garlic
- Dried basil

### Earth

- Sage
- Thyme
- Black pepper
- Mustard powder

## Splashes

- Low-sodium soy sauce
- Mustard
- Salsa
- Vinegar
- Hot sauce
- Lemon juice
- Lime juice

## Pantry

- Cooking spray
- Nonstick foil
- Coffee
- Tea
- Zero-calorie beverages

Flavor kits don't count toward protein or G/S servings.

Splashes are liquids used while cooking — normal amounts, not a beverage.
