Welcome

Congratulations! You have in your hands the most advanced diet available anywhere, at any price. It is the most individualized program available for losing fat. This diet will not work effectively for anyone else because it has been created just for you, using your LBM, your job, your lifestyle and your daily plan for exercise & activities.

How we did it. We determined your lean weight using sophisticated body composition testing. Then you told us about your job, lifestyle, exercise and activities. With this information, the computer generated this four-page report. Included is your ultrasound body composition report that I call your Lean Body Analysis, and the last two pages are your custom designed diet.

Lean Body Analysis

Page two is the results of your body composition test. Although very few people want to know how fat they are, all of them want to how to lose fat. Our Lean Body Analysis page includes a breakdown of your current body composition with an emphasis on the good stuff. LBM (lean body mass) is used by the computer to calculate your metabolic rate (RMR). In addition, the Lean Body Analysis projects appropriate weight goals based on your current lean body mass.

Food Plan

Page three is your custom-designed diet. How much food you need each day depends on how much LBM you have, your job, lifestyle and the type and amount of exercise you participate in. Based on the information you provide, this diet gives you the amount of protein, carbohydrates and fat you need per day to lose fat. It also tells you how much fat you can lose in eight weeks. And it shows you what your body requires at rest (your resting metabolic rate), for your workday and for one hour of each type of exercise.

Servings

Page four is the servings page. No need to count calories or macros in this diet. The computer breaks down all the information from the table on page three and shows you the number of servings you need daily to have maximum strength & energy and to lose fat as fast as possible.

Lean Body Analysis

Height: 66 inches Sex: FEMALE Thigh: 25 mm Waist: 25 mm Age: 28 years of experience

--TODAY--

Lean weight 113.7 lbs 61.78% of you	Fat weight 70.3 lbs 38.22% of you	Total weight 184.0 lbs on the scale today
--	--	--

Extreme	Healthy	Average	Borderline	At Risk
9%-13.99%	14%-20.99%	21%-25.99%	26%-31.99%	Over 32 +%

According to the American Council on Exercise you are at risk based on your current fat percentage.

How much fat is right for each individual is a personal choice. How you look in the mirror is the only true judge of whether you have fat to lose. If you see more fat than you personally want, then exercise and follow your this plan until you reach your desired goals.

A female your height in good condition has 106 pounds or more of lean body weight.

CONGRATULATIONS! Your LBM is at or above the desirable amount. Even so, it's a good idea to exercise at least twice a week. If you want to gain lean or maybe just tone and shape your body, do so by participating in a weight-training program two to three times a week under the guidance of an experienced trainer. The table below tells us what you would weigh for the different health categories based on your current Lean Body Mass. Increasing or decreasing your LBM would increase or decrease the suggested body weight accordingly. For maximum success, feed your body properly. This diet will show you how much food you need daily for maximum results.

Extreme	Healthy	Average	Borderline	At Risk
125-130 lbs.	131-143 lbs.	144-152 lbs.	153-167 lbs.	167 lbs. or more

Continue to monitor your body composition using Lean Body Analysis every 6 to 8 weeks to make sure you are losing only fat and not lean! If you want to lose fat, do so by following this diet as closely as you can. This plan allows you to lose all the fat you want to lose while increasing your strength & energy.

Food Plan

The following food program contains a sophisticated calculation that is based on your individual lean body mass (LBM), and on your activities. This is the most individualized food program available for losing fat. In eight weeks, you could safely lose 11.0 pounds of fat. On your information sheet, you indicated you plan to exercise a total of 6.00 hour(s) per week. 3.00 hour(s) of weight training, 0.00 hour(s) of cardiovascular activities, 3.00 hour(s) of fat-burning activities

	TODAY			EIGHT WEEK GOAL	
LEAN	61.78%	113.7 lbs.		65.71%	113.7 lbs.
FAT	38.22%	70.3 lbs.	-11.0 lbs. of fat	34.29%	59.3 lbs.
TOTAL	100.00%	184.0 lbs.		100.00%	173.0 lbs.

You project to lose an average of 1.3 pounds of fat per week. In addition, you could gain lean weight. Gaining lean weight will increase your strength and energy and offset your fat loss.

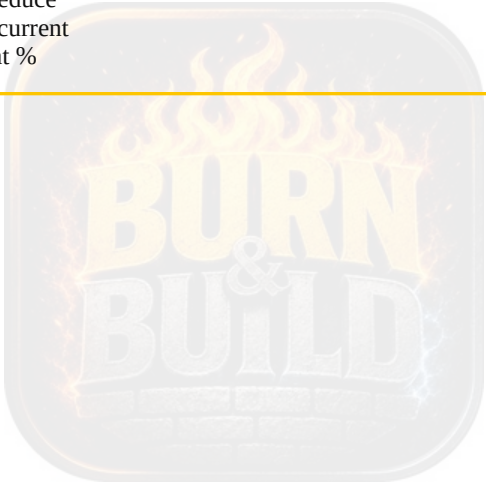

How much food you need each day depends on how much LBM you have. Also, it depends on your activity level and the type and amount of exercise you participate in. Based on the information you provided, the following table gives you the number of calories and the amount of protein, carbohydrates and fat you need per day to maintain your fat or to reduce body fat. Also listed is what your body requires at rest (your resting metabolic rate), for your workday and for one hour of each type of exercise.

	grams	calories	grams	calories	grams	calories	calories
	PROTEIN		CARBS		FATS		TOTAL
Maintain current fat %	71	284	219	876	115	1,032	2,192
Reduce current fat %	71	284	219	876	44	392	1,552
Resting(RMR)	44	176	78	312	80	723	1,211
Workday (1.5a)	25	100	90	360	27	245	702
Weight Training	9	36	96	384	3	29	448
Cardiovascular Activities	3	12	88	352	16	144	509
Fat Burning Activities	5	20	54	216	22	201	436

Servings

Food List

Protein Staples

1% milk	235g
Chicken breast	26g
Cod	35g
Cottage cheese, 1%	73g
Cottage cheese, 2%	73g
Cottage cheese, nonfat	73g
Egg whites (extra large)	2 whites
Egg whites (small)	3 whites
Eye of round	25g
Greek yogurt, lowfat	84g
Lactose-free skim milk	237g
Lean ground beef (ground round)	27g
Plain Greek yogurt, nonfat	78g
Ricotta, nonfat	73g
Shrimp	33g
Sirloin steak	28g
Skim milk	237g
Tilapia	31g
Tuna (canned)	34g
Turkey breast	28g
Yogurt, plain, nonfat	140g

Grains & Starches

Bagel	25g
Beans (any on list)	66g
Cheerios	19g
Corn grits	23g
Corn, sweet	17g
Cream of Wheat (dry)	19g
English muffin	31g
Farina (dry)	19g
French bread	25g
Hard roll	23g
Mixed peas and carrots	139g
Multigrain bread	29g
Oatmeal (dry)	22g
Pasta (cooked)	61g
Pasta, whole wheat (cooked)	61g
Peas, green	83g
Peas, split	126g
Pita (pocket)	24g
Popcorn (air popped)	36g
Potato, baked (with skin)	86g
Potato, boiled	96g
Quinoa (cooked)	66g
Rice, brown (cooked)	55g
Rice, white (cooked)	58g
Rye bread	27g
Squash, summer (yellow)	325g
Squash, winter (hubbard)	160g
Squash, zucchini	479g
Sweet potato	55g
Tortilla, corn (6-inch)	31g
Tortilla, whole wheat	19g
Whole wheat bread	29g
Whole wheat roll	27g

Food List

Vegetables

Asparagus (cooked)	244g
Bell peppers, red (cooked)	159g
Broccoli (cooked)	139g
Carrots (cooked)	122g
Cauliflower (cooked)	244g
Cucumbers (raw)	278g
Green beans (cooked)	141g
Mixed salad greens (raw)	303g
Mushrooms, white (cooked)	189g
Spinach (cooked)	263g
Tomatoes (raw)	256g

Fruit

Apples (raw)	130g
Bananas (raw)	79g
Blueberries (raw)	124g
Clementines (raw)	150g
Grapes (raw)	99g
Pineapple (raw)	137g
Strawberries (raw)	234g
Tangerines (raw)	135g
Watermelon (raw)	237g
