

# FOOD PLAN

The following food program contains a sophisticated calculation that is based on your individual lean body mass (LBM), and on your activities. This is the most individualized food program available for losing fat and getting more energy.

In eight weeks, you could lose **11.0 pounds of fat**. On your information sheet, you indicated you plan to exercise a total of **6.00 hour(s) per week**.

3.00 hour(s) of weights/racquet sports, 0.00 hour(s) of cardiovascular activities, 3.00 hour(s) of fat-burning activities

| TODAY                                                                                                                                  | YOU COULD LOSE                 | 8-WEEK GOAL                                                                                                                            |
|----------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| <b>LEAN</b><br>61.78%<br><b>113.7 lbs.</b><br><b>FAT</b><br>38.22%<br><b>70.3 lbs.</b><br><b>TOTAL</b><br>100.00%<br><b>184.0 lbs.</b> | <b>-11.0</b><br><b>LBS FAT</b> | <b>LEAN</b><br>65.71%<br><b>113.7 lbs.</b><br><b>FAT</b><br>34.29%<br><b>59.3 lbs.</b><br><b>TOTAL</b><br>100.00%<br><b>173.0 lbs.</b> |

Your plan projects an average fat loss of 1.3 pounds per week. In addition, you could gain lean weight. Gaining lean weight will increase your strength and energy and offset your fat loss.

How much food you need each day depends on how much LBM you have. Also, it depends on your activity level and the type and amount of exercise you participate in. Based on the information you provided, the following table gives you the number of calories and the amount of protein, carbohydrates and fat you need per day to maintain your fat or to reduce body fat. Also listed is what your body requires at rest (your resting metabolic rate), for your workday and for one hour of each type of exercise.

| YOUR DAILY FOOD REQUIREMENTS            |           |            |            |            |           |            |              |

# SERVINGS

Your daily servings and how to use them.

|                   | Daily | Breakfast                     | Fruit | Lunch | Fruit | Dinner | Fruit |
|-------------------|-------|-------------------------------|-------|-------|-------|--------|-------|
| Protein & Dairy   | 9     | 3                             |       | 3     |       | 3      |       |
| Grains & Starches | 9     | 3                             |       | 3     |       | 3      |       |
| Veggies           | 1     | can be eaten any time of day. |       |       |       |        |       |
| Fruit             | 3     |                               | 1     |       | 1     |        | 1     |

## GETTING STARTED

- Eat all the servings recommended.
- Alternate meals with fruit snacks.
- Eat every two to three hours.

### Helpful Tips

#### Salt

Using salt is a personal choice. Most people find when they eat less fat, they also eat less salt (chips, cheese, margarine, bacon, sausage, fast food)—you get the point.

#### Beverages

Coffee, tea, diet drinks and seltzer water are fine. Although they do not affect fat loss, you may want to avoid them for other health reasons. Water is the best drink in the house. A simple rule is to drink a glass with every meal and snack that you eat.

NOTE: Always consult your physician before starting this plan or making any change in your eating habits.

# FOOD LIST

The amount shown is calculated to match your servings. No math needed.

## Protein & Dairy

|                                       |                                                     |
|---------------------------------------|-----------------------------------------------------|
| Chicken breast .....                  | <b>78g</b>                                          |

# LEAN BODY ANALYSIS

**TODAY**

LEAN  
**113.7 lbs**  
61.78%

FAT  
**70.3 lbs**  
38.22%

TOTAL  
**184.0 lbs**  
100.00%

## YOUR BODY FAT RANGE

38.22% → **HIGH**

| VERY LEAN | LEAN       | AVERAGE    | ABOVE AVERAGE | HIGH              |
|-----------|------------|------------|---------------|-------------------|
| 9%-13.99% | 14%-20.99% | 21%-25.99% | 26%-31.99%    | <b>Over 32 +%</b> |

How much body fat is right for you is a personal choice. If you have more body fat than you personally want, your Burn & Build plan gives you a path toward changing it.

Desirable lean body mass for your height is 106 pounds or more.

**113.7 lbs** lean body mass

**Your LBM is at or above the desirable amount for your height.**

## Why Lean Body Mass Matters

Lean body mass (predominantly muscle) is your strength, your energy, and your true body shape under your fat. It's your muscle, bones, organs, skin, hair, and hormones.

**Actually, it's you.**

Eating to keep your muscle (LBM) is a solid move toward being as healthy and vibrant as possible. When your lean mass is gone, you are gone.

## AT YOUR CURRENT 113.7 LBS OF LEAN MASS

Here are the body weights corresponding to the different body-fat ranges.

| VERY LEAN    | LEAN         | AVERAGE      | ABOVE AVERAGE | HIGH                    |
|--------------|--------------|--------------|---------------|-------------------------|
| 125-130 lbs. | 131-143 lbs. | 143-152 lbs. | 153-166 lbs.  | <b>167 lbs. or more</b> |

## RECHECK YOUR PROGRESS

Recheck your body composition every 6–8 weeks. The goal is to see fat coming down while protecting your lean body mass, strength and energy.

# QUESTIONNAIRE **CONFIRMATION**

These are the answers used to build your personalized food plan.

|                                                                 |                                       |
|-----------------------------------------------------------------|---------------------------------------|
| 1. What is your full name?                                      | <b>Sample Female</b>                  |
| 2. What is your gender?                                         | <b>female</b>                         |
| 3. What is your email address?                                  | <b>verify@example.com</b>             |
| 4. Who do we thank?                                             | <b>—</b>                              |
| 5. How physically active is your job?                           | <b>Sitting</b>                        |
