Welcome

Congratulations! You have in your hands the most advanced diet available anywhere, at any price. It is the most individualized program available for losing fat. This diet will not work effectively for anyone else because it has been created just for you, using your lean body mass (LBM), your job, your day to day, and your weekly plan for weight training (WT), high heart rate aerobic activity (HHT), and low heart rate aerobic activity (LHR).

How we did it. We determined your lean weight using sophisticated body composition testing. Then you told us about your job, day to day, and exercise hours. With this information, the computer generated this report. Page two is your Projections, and the following pages are your custom-designed diet.

Projections

Page two is your Projections page. It brings together your lean body mass (LBM), your job, your day to day, and the hours you plan to spend on weight training (WT), high heart rate aerobic activity (HHT), and low heart rate aerobic activity (LHR) — the same inputs the computer uses to build your food plan. The timeline table shows your projected fat and body fat % over the next eight weeks.

Food Plan

Page three is your custom-designed food plan. We use your body composition information to determine your LBM (lean body mass), then factor in your job, your day to day, and how many hours per week you spend on weight training (WT), high heart rate aerobic work (HHT) such as running or hard cardio, and low heart rate aerobic work (LHR) such as walking or easy cycling. The page shows how much fat you can lose in eight weeks, compares your body today with your eight-week goal, and explains what happens when protein, carbohydrates, or fat are too high or too low — so the servings on the next page make sense without counting grams.

Servings

Page four is the servings page. No need to count calories or macronutrients (protein, carbohydrates, and fat) yourself. The computer turns everything from page three into daily servings divided across breakfast, lunch, dinner, and snacks — so you have maximum strength and energy while losing fat as fast as this plan allows.

Projections

FAT LOSS	BODY FAT %	TIMELINE
	38.22% to 34.29%	8 weeks

The following food program contains a sophisticated calculation that is based on your individual lean body mass (LBM), and on your activities. This is the most individualized food program available for losing fat and building muscle. In your questionnaire, you indicated you plan to exercise a total of 6.00 hour(s) per week. 3.00 hour(s) of weight training, 0.00 hour(s) of cardiovascular activities, 3.00 hour(s) of fat-burning activities

LBM	JOB			DAY TO DAY		
113.7 lbs	Sitting	Moving	Lifting	Comfortable	Busy	Stressful
WT	HHT			LHR		
3.00 hours per week	0.00 hours per week			3.00 hours per week		

The burn engine uses the information above to calculate your RMR (resting metabolic rate). In other words how much protein, carbohydrates and fat do use every day. Now the burn engine can calculates how much body fat you can safely lose per day. The table below shows you projected body weight and fat% every eight weeks. Use this table to determine when to start your Burn & Build diet to reach your goal on time. Showtime is the extreme bodybuilder competition look. Dont panic the good news here is the look you want is somewhere between where you are now and Showtime. When you look like you want to look ease up on the diet. If you drift back up. Tighten up the diet. Fine tuning day to ay week to week keeps looking great year round. and heres to best part of all. You can do this without counting calories or tracking macros because the Burn & Build engine shows you exactly what you need to eat to reach your goal.

BODYWEIGHT	TIMELINE	BODY FAT %
184 lbs	Current	38.22%
173.0 lbs	8 weeks	34.28%
162.0 lbs	16 weeks	29.81%
151.0 lbs	24 weeks	24.70%
140.0 lbs	32 weeks	18.79%
129.0 lbs	40 weeks	11.86%
123.9 lbs	43.7 weeks	8.95% (Showtime)

Food Plan

We have been converting macros since 1982.

The challenge with macros is slippage.

Step 4 — Turn targets into servings

The computer calculated your daily food targets, then converted them into servings — protein, grains, vegetables, fruits, and fats.

You follow servings, not calories. The math is already done. Your job is to pick foods from the approved food list and hit your daily totals.

THE MACROS	TOO MUCH	TOO LITTLE
PROTEIN	GAIN FAT	LOSE LBM (MUSCLE)
CARBOHYDRATES	GAIN FAT	LOSE ENERGY
FAT	GAIN FAT	LOSE FAT

Servings

NOTE: Always consult your physician before starting this plan or making any change in your eating habits.

	Daily	Breakfast	Snack	Lunch	Snack	Dinner	Snack
Protein	9	3		3		3	
Grains/Starches	9	3		3		3	
Veggies	1						
Fruits	3		1		1		1

Food List

Protein Staples

1% milk	705g
Chicken breast	78g
Cod	105g
Cottage cheese, 1%	219g
Cottage cheese, 2%	219g
Cottage cheese, nonfat	219g
Egg whites (extra large)	6 whites
Egg whites (small)	9 whites
Eye of round	75g
Greek yogurt, lowfat	252g
Lactose-free skim milk	711g
Lean ground beef (ground round)	81g
Plain Greek yogurt, nonfat	234g
Ricotta, nonfat	219g
Shrimp	99g
Sirloin steak	84g
Skim milk	711g
Tilapia	93g
Tuna (canned)	102g
Turkey breast	84g
Yogurt, plain, nonfat	420g

Grains & Starches

Bagel	75g
Beans (any on list)	198g
Cheerios	57g
Corn grits	69g
Corn, sweet	51g
Cream of Wheat (dry)	57g
English muffin	93g
Farina (dry)	57g
French bread	75g
Hard roll	69g
Mixed peas and carrots	417g
Multigrain bread	87g
Oatmeal (dry)	66g
Pasta (cooked)	183g
Pasta, whole wheat (cooked)	183g
Peas, green	249g
Peas, split	378g
Pita (pocket)	72g
Popcorn (air popped)	108g
Potato, baked (with skin)	258g
Potato, boiled	288g
Quinoa (cooked)	198g
Rice, brown (cooked)	165g
Rice, white (cooked)	174g
Rye bread	81g
Squash, summer (yellow)	975g
Squash, winter (hubbard)	480g
Squash, zucchini	1437g
Sweet potato	165g
Tortilla, corn (6-inch)	93g
Tortilla, whole wheat	57g
Whole wheat bread	87g
Whole wheat roll	81g

Food List

Vegetables

Asparagus (cooked)	244g
Asparagus (raw)	256g
Bell peppers, orange (cooked)	118g
Bell peppers, orange (raw)	117g
Bell peppers, red (cooked)	159g
Bell peppers, red (raw)	167g
Bell peppers, yellow (cooked)	159g
Bell peppers, yellow (raw)	159g
Broccoli (cooked)	139g
Broccoli (raw)	152g
Carrots (cooked)	122g
Carrots (raw)	104g
Cauliflower (cooked)	244g
Cauliflower (raw)	200g
Cucumbers (raw)	278g
Green beans (cooked)	141g
Green beans (raw)	141g
Mushrooms, white (cooked)	189g
Mushrooms, white (raw)	303g
Spinach (cooked)	263g
Spinach (raw)	278g
Tomatoes (cooked)	250g
Tomatoes (raw)	256g

Fruit

Apples (raw)	130g
Bananas (raw)	79g
Blueberries (raw)	124g
Cantaloupe (raw)	220g
Clementines (raw)	150g
Dried plums (pitted prunes)	29g
Grapes (raw)	99g
Pineapple (raw)	137g
Strawberries (raw)	234g
Tangerines (raw)	135g
Watermelon (raw)	237g

Seasonings And Splashes

Flavor Kits Fire • Chili powder • Cumin • Garlic powder • Salt • Black pepper Iron • Salt • Black pepper • Garlic powder • Onion powder Green • Lemon pepper • Garlic • Dried basil Earth • Sage • Thyme • Black pepper • Mustard powder	Splashes • Low-sodium soy sauce • Mustard • Salsa • Vinegar • Hot sauce • Lemon juice • Lime juice 	Pantry • Cooking spray • Nonstick foil • Coffee • Tea • Zero-calorie beverages
--	--	---

Flavor kits don’t count toward protein or G/S servings.

Splashes are liquids used while cooking — normal amounts, not a beverage.
