## Steps to Success

---

Congratulations — you have the most individualized fat-loss program available, built from your lean body mass, workday, lifestyle, and exercise plan. These steps show you how to use it for maximum results.

### **1 Know your numbers**

Review your Lean Body Analysis. Your LBM drives your metabolic rate and your daily food prescription. The mirror — not the scale alone — tells you whether you have fat to lose.

### **2 Eat your servings**

Follow the daily serving totals on your Servings page. No calorie or macro counting — the computer already did that work. Stay within the approved food groups.

### **3 Plan your week**

Use the menu planner online to assign foods to each meal, track servings, and build your grocery list. Print your week at a glance from Print Shop before you shop.

### **4 Eat on schedule**

Spread protein through breakfast, lunch, and dinner. Eat vegetables at dinner and fruit at snack times. Regular feedings keep energy steady and protect lean mass.

### **5 Stay consistent**

Keep your exercise and activity aligned with what you reported when this plan was built. Changing workouts without updating your program can slow fat loss.

### **6 Check in regularly**

Re-test body composition every 6 to 8 weeks. You want to confirm you are losing fat — not lean. Adjust only after you know what the numbers say.

---

For detailed guidance, open Print Shop from the menu planner — For Best Results, the food list, and Frequently Asked Questions.

Lean Body Analysis

Height: 66 inches Sex: FEMALE Thigh: 25 mm Waist: 25 mm Age: 28 years of experience

--TODAY--

|       |          |            |
|-------|----------|------------|
| LEAN  | 61.78 %  | 113.7 lbs. |
| FAT   | 38.22 %  | 70.3 lbs.  |
| TOTAL | 100.00 % | 184.0 lbs. |

| Extreme   | Healthy    | Average    | Borderline | At Risk    |
|-----------|------------|------------|------------|------------|
| 9%-13.99% | 14%-20.99% | 21%-25.99% | 26%-31.99% | Over 32 +% |

According to the American Council on Exercise you are at risk based on your current fat percentage.

How much fat is right for each individual is a personal choice. How you look in the mirror is the only true judge of whether you have fat to lose. If you see more fat than you personally want, then exercise and follow your this plan until you reach your desired goals.

A female your height in good condition has 106 pounds or more of lean body weight.

CONGRATULATIONS! Your LBM is at or above the desirable amount. Even so, it's a good idea to exercise at least twice a week. If you want to gain lean or maybe just tone and shape your body, do so by participating in a weight-training program two to three times a week under the guidance of an experienced trainer. The table below tells us what you would weigh for the different health categories based on your current Lean Body Mass. Increasing or decreasing your LBM would increase or decrease the suggested body weight accordingly. For maximum success, feed your body properly. This diet will show you how much food you need daily for maximum results.

| Extreme      | Healthy      | Average      | Borderline   | At Risk          |
|--------------|--------------|--------------|--------------|------------------|
| 125-130 lbs. | 131-143 lbs. | 144-152 lbs. | 153-167 lbs. | 167 lbs. or more |

Continue to monitor your body composition using Lean Body Analysis every 6 to 8 weeks to make sure you are losing only fat and not lean! If you want to lose fat, do so by following this diet as closely as you can. This plan allows you to lose all the fat you want to lose while increasing your strength & energy.

Food Plan

The following food program contains a sophisticated calculation that is based on your individual lean body mass (LBM), and on your activities. This is the most individualized food program available for losing fat. In eight weeks, you could safely lose 11.0 pounds of fat. On your information sheet, you indicated you plan to exercise a total of 6.00 hour(s) per week. 3.00 hour(s) of weight training, 0.00 hour(s) of cardiovascular activities, 3.00 hour(s) of fat-burning activities

|       | TODAY   |            |                   | EIGHT WEEK GOAL |            |
|-------|---------|------------|-------------------|-----------------|------------|
| LEAN  | 61.78%  | 113.7 lbs. |                   | 65.71%          | 113.7 lbs. |
| FAT   | 38.22%  | 70.3 lbs.  | -11.0 lbs. of fat | 34.29%          | 59.3 lbs.  |
| TOTAL | 100.00% | 184.0 lbs. |                   | 100.00%         | 173.0 lbs. |

You project to lose an average of 1.3 pounds of fat per week. In addition, you could gain lean weight. Gaining lean weight will increase your strength and energy and offset your fat loss.

How much food you need each day depends on how much LBM you have. Also, it depends on your activity level and the type and amount of exercise you participate in. Based on the information you provided, the following table gives you the number of calories and the amount of protein, carbohydrates and fat you need per day to maintain your fat or to reduce body fat. Also listed is what your body requires at rest (your resting metabolic rate), for your workday and for one hour of each type of exercise.

|                           | grams   | calories | grams | calories | grams | calories | calories |
|---------------------------|---------|----------|-------|----------|-------|----------|----------|
|                           | PROTEIN |          | CARBS |          | FATS  |          | TOTAL    |
| Maintain current fat %    | 71      | 284      | 219   | 876      | 115   | 1,032    | 2,192    |
| Reduce current fat %      | 71      | 284      | 219   | 876      | 44    | 392      | 1,552    |
| Resting(RMR)              | 44      | 176      | 78    | 312      | 80    | 723      | 1,211    |
| Workday (1.5a)            | 25      | 100      | 90    | 360      | 27    | 245      | 702      |
| Weight Training           | 9       | 36       | 96    | 384      | 3     | 29       | 448      |
| Cardiovascular Activities | 3       | 12       | 88    | 352      | 16    | 144      | 509      |
| Fat Burning Activities    | 5       | 20       | 54    | 216      | 22    | 201      | 436      |
