

Personalized exclusively for: Kristi Warner

On: January 15th, 2024

Welcome

Congratulations! You have in your hands the most advanced diet available anywhere, at any price. It is the most individualized program available for losing fat. This diet will not work effectively for anyone else because it has been created just for you, using your lean body mass (LBM), your job, your day to day, and your weekly plan for weight training (WT), high heart rate aerobic activity (HHT), and low heart rate aerobic activity (LHR).

How we did it. We determined your lean weight using sophisticated body composition testing. Then you told us about your job, day to day, and exercise hours. With this information, the computer generated this report. Page two is your Lean Body Analysis; the pages that follow are your projections and custom-designed diet.

Lean Body Analysis

Page two is the results of your body composition test. Although very few people want to know how fat they are, all of them want to know how to lose fat. Our Lean Body Analysis page includes a breakdown of your current body composition with an emphasis on the good stuff. LBM (lean body mass) is used by the computer to calculate your metabolic rate (RMR). In addition, the Lean Body Analysis projects appropriate weight goals based on your current lean body mass.

Projections

Pages three and four are your Projections. They bring together your lean body mass (LBM), your job, your day to day, and the hours you plan to spend on weight training (WT), high heart rate aerobic activity (HHT), and low heart rate aerobic activity (LHR) — the same inputs the computer uses to build your food plan. The timeline table shows your projected fat and body fat % over the next eight weeks.

Food Plan

Page five is your custom-designed food plan. We use your body composition information to determine your LBM (lean body mass), then factor in your job, your day to day, and how many hours per week you spend on weight training (WT), high heart rate aerobic work (HHT) such as running or hard cardio, and low heart rate aerobic work (LHR) such as walking or easy cycling. The page shows how much fat you can lose in eight weeks, compares your body today with your eight-week goal, and explains what happens when protein, carbohydrates, or fat are too high or too low — so the servings on the next page make sense without counting grams.

Servings

Page six is the servings page. No need to count calories or macronutrients (protein, carbohydrates, and fat) yourself. The computer turns everything from page five into daily servings divided across breakfast, lunch, dinner, and snacks — so you have maximum strength and energy while losing fat as fast as this plan allows.

Lean Body Analysis

Height: 66 inches Sex: FEMALE Thigh: 25 mm Waist: 25 mm Age: 28 years of experience

--TODAY--

LEAN	61.78 %	113.7 lbs.
FAT	38.22 %	70.3 lbs.
TOTAL	100.00 %	184.0 lbs.

Prepping

Training

Off-season

How much fat is right for each individual is a personal choice. How you look in the mirror is the only true judge of whether you have fat to lose. If you see more fat than you personally want, then exercise and follow your this plan until you reach your desired goals.

A female your height in good condition has 106 pounds or more of lean body weight.

CONGRATULATIONS! Your LBM is at or above the desirable amount. Even so, it's a good idea to exercise at least twice a week. If you want to gain lean or maybe just tone and shape your body, do so by participating in a weight-training program two to three times a week under the guidance of an experienced trainer. The table below tells us what you would weigh for the different health categories based on your current Lean Body Mass. Increasing or decreasing your LBM would increase or decrease the suggested body weight accordingly. For maximum success, feed your body properly. This diet will show you how much food you need daily for maximum results.

Competition	Peaking	Prepping	Training
125 lbs.	132 lbs.	140 lbs.	150 lbs.

Continue to monitor your body composition using Lean Body Analysis every 6 to 8 weeks to make sure you are losing only fat and not lean! If you want to lose fat, do so by following this diet as closely as you can. This plan allows you to lose all the fat you want to lose while increasing your strength & energy.

Projections

FAT LOSS	BODY FAT %	TIMELINE
	38.22% to 34.29%	8 weeks

The following food program contains a sophisticated calculation that is based on your individual lean body mass (LBM), and on your activities. This is the most individualized food program available for losing fat and building muscle. In your questionnaire, you indicated you plan to exercise a total of 6.00 hour(s) per week. 3.00 hour(s) of weight training, 0.00 hour(s) of cardiovascular activities, 3.00 hour(s) of fat-burning activities

LBM	JOB			DAY TO DAY		
113.7 lbs	Sitting	Moving	Lifting	Comfortable	Busy	Stressful
WT	HHT			LHR		
3.00 hours per week	0.00 hours per week			3.00 hours per week		

The burn engine uses the information above to calculate your RMR (resting metabolic rate). In other words how much protein, carbohydrates and fat do use every day. Now the burn engine can calculates how much body fat you can safely lose per day. The table below shows you projected body weight and fat% every eight weeks. Use this table to determine when to start your Burn & Build diet to reach your goal on time. Showtime is the extreme bodybuilder competition look. Dont panic the good news here is the look you want is somewhere between where you are now and Showtime. When you look like you want to look ease up on the diet. If you drift back up. Tighten up the diet. Fine tuning day to ay week to week keeps looking great year round. and heres to best part of all. You can do this without counting calories or tracking macros because the Burn & Build engine shows you exactly what you need to eat to reach your goal.

BODYWEIGHT	TIMELINE	BODY FAT %
184 lbs	Current	38.22%
173.0 lbs	8 weeks	34.28%
162.0 lbs	16 weeks	29.81%
151.0 lbs	24 weeks	24.70%
140.0 lbs	32 weeks	18.79%
129.0 lbs	40 weeks	11.86%
123.9 lbs	43.7 weeks	8.95% (Showtime)

Food Plan

We have been converting macros since 1982.

The challenge with macros is slippage.

Step 4 — Turn targets into servings

The computer calculated your daily food targets, then converted them into servings — protein, grains, vegetables, fruits, and fats.

You follow servings, not calories. The math is already done. Your job is to pick foods from the approved food list and hit your daily totals.

THE MACROS	TOO MUCH	TOO LITTLE
PROTEIN	GAIN FAT	LOSE LBM (MUSCLE)
CARBOHYDRATES	GAIN FAT	LOSE ENERGY
FAT	GAIN FAT	LOSE FAT

Servings

NOTE: Always consult your physician before starting this plan or making any change in your eating habits.

	Daily	Breakfast	Snack	Lunch	Snack	Dinner	Snack
Protein	9	3		3		3	
Grains/Starches	9	3		3		3	
Veggies	1						
Fruits	3		1		1		1

Food List

Protein Staples

1% milk	705g
Chicken breast	78g
Cod	105g
Cottage cheese, 1%	219g
Cottage cheese, 2%	219g
Cottage cheese, nonfat	234g
Egg whites (extra large)	6 whites
Egg whites (small)	9 whites
Eye of round	81g
Greek yogurt, lowfat	240g
Lactose-free skim milk	705g
Lean ground beef (ground round)	81g
Plain Greek yogurt, nonfat	234g
Ricotta, nonfat	210g
Shrimp	99g
Sirloin steak	81g
Skim milk	705g
Tilapia	93g
Tuna (canned)	102g
Turkey breast	84g
Yogurt, plain, nonfat	420g

Grains & Starches

Bagel	84g
Beans (any on list)	177g
Cheerios	57g
Corn grits	54g
Corn, sweet	195g
Cream of Wheat (dry)	54g
English muffin	96g
Farina (dry)	54g
French bread	81g
Hard roll	81g
Mixed peas and carrots	420g
Multigrain bread	96g
Oatmeal (dry)	63g
Pasta (cooked)	168g
Pasta, whole wheat (cooked)	159g
Peas, green	270g
Peas, split	204g
Pita (pocket)	75g
Popcorn (air popped)	54g
Potato, baked (with skin)	198g
Potato, boiled	210g
Quinoa (cooked)	198g
Rice, brown (cooked)	180g
Rice, white (cooked)	150g
Rye bread	87g
Sweet potato	204g
Tortilla, corn (6-inch)	93g
Tortilla, whole wheat	93g
Whole wheat bread	102g
Whole wheat roll	81g

Food List

Vegetables

Asparagus (cooked)	256g
Asparagus (raw)	256g
Bell peppers, orange (cooked)	149g
Bell peppers, orange (raw)	167g
Bell peppers, red (cooked)	149g
Bell peppers, red (raw)	167g
Bell peppers, yellow (cooked)	149g
Bell peppers, yellow (raw)	167g
Broccoli (cooked)	139g
Broccoli (raw)	152g
Carrots (cooked)	122g
Carrots (raw)	104g
Cauliflower (cooked)	244g
Cauliflower (raw)	200g
Cucumbers (raw)	278g
Green beans (cooked)	143g
Green beans (raw)	143g
Mushrooms, white (cooked)	189g
Mushrooms, white (raw)	303g
Spinach (cooked)	263g
Spinach (raw)	278g
Squash, summer (yellow) (raw)	294g
Squash, winter (hubbard) (raw)	115g
Squash, zucchini (raw)	323g
Tomatoes (cooked)	250g
Tomatoes (raw)	256g

Fruit

Apples (raw)	130g
Bananas (raw)	79g
Blueberries (raw)	124g
Cantaloupe (raw)	220g
Clementines (raw)	150g
Dried plums (pitted prunes)	28g
Grapes (raw)	99g
Pineapple (raw)	137g
Strawberries (raw)	234g
Tangerines (raw)	135g
Watermelon (raw)	237g

Seasonings And Splashes

Flavor Kits Fire • Chili powder • Cumin • Garlic powder • Salt • Black pepper Iron • Salt • Black pepper • Garlic powder • Onion powder Green • Lemon pepper • Garlic • Dried basil Earth • Sage • Thyme • Black pepper • Mustard powder	Splashes • Low-sodium soy sauce • Mustard • Salsa • Vinegar • Hot sauce • Lemon juice • Lime juice 	Pantry • Cooking spray • Nonstick foil • Coffee • Tea • Zero-calorie beverages
--	--	--

Flavor kits don’t count toward protein or G/S servings.

Splashes are liquids used while cooking — normal amounts, not a beverage.
